

Coming to school and spending time away from your family

In March an illness called Coronavirus was making some people sick.

To keep ourselves safe and healthy some of us have spent a lot of time at home with our families.

We stayed healthy by washing our hands regularly each day and staying 2 metres away from others.

In August you will start spending some days at school.

Coming to school and spending time away from your family

You may feel sad or worried about leaving your family.

It might help to give them a hug or kiss goodbye each morning.

All the adults at school are there to help you learn and have fun.

At the end of each school day you will go home to your family.

You might want to give them a "hello again" hug or kiss .
