

## **Ready, respect, safe**

We use **restorative approaches**.

We build, maintain and repair relationships throughout our school.

### **Teaching about emotions**

We support our children to develop their understanding of feelings, what causes them and how to manage them appropriately through Zones of Regulation, Emotions Talk and Building Resilience.

### **Our values**

We teach our children about our friendship, respect, honesty and perseverance and model these for our children.

### **Restorative conversations**

We use these conversations to allow children to think and speak about the impact their actions have on others and to take responsibility for repairing relationships.

### **Consequences**

When things go wrong there are consequences for children which are proportionate and as close to the event as possible to allow for reflection.
